

Draught proof the porch

Issue

The porch has single glazed stained glass, which is very pretty and very cold. Some of the pieces are cracked or even missing.

There were also large draughts under and around the front door.

Action

I installed:

3mm polycarbonate sheet cut to size from Plastic People in Leeds

930mm x 630 mm £21.67

515mm x 1690mm £29.83

attached with magnetic strip from B&Q

£4.99 for 2.5m x 3 packs = £14.97

Door strip to bottom of front door

Draught excluder around front door.

Two under-door brushes for inner porch doors

Effect

The porch is much warmer and less draughty and the cold draught coming under the inner porch doors into the hall is much reduced and less cold.
